## INVESTMENT STRATEGIES

ICON Leisure and Consumer Staples Fund uses a quantitative methodology to identify securities ICON believes are underpriced relative to value. It normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in equity securities of companies in the Leisure & Consumer Staples sectors, including, but not limited to: Agricultural Products, Brewers, Broadcasting & Cable TV, Casinos & Gaming, Distillers & Vintners, Drug Retail, Food Distributors, Food Retail, Hotels, Resorts & Cruise Lines, Household Products, Hypermarkets & Super Centers, Leisure Facilities, Leisure Products, Movies & Entertainment, Packaged Foods & Meats, Personal Products, Photographic Products, Publishing, Restaurants, Soft Drinks, and Tobacco. This strategy may not be changed unless Fund shareholders are given at least 60 days' prior notice. Equity securities in which the Fund may invest include common and preferred stocks of companies of any market capitalization. The Consumer Staples sector is categorized by the Global Industry Classification Standard ("GICS"). The Leisure sector, as defined by ICON, consists of sub-industries in the Consumer Discretionary sector as categorized by GICS, which the Adviser believes are best characterized as leisure related.

## A MULTI-CAP INVESTMENT DISCIPLINE

ICON believes global markets have themes, in which certain industries assume leadership for many months or even years. To help determine this leadership, ICON analyzes more than 1,700 domestic securities, which are classified into industries, to determine which industries are overpriced or underpriced relative to ICON's estimate of their intrinsic value.

Guided by this value-based quantitative system, ICON seeks to purchase industries estimated to be underpriced and sells industries believed to be overpriced. Using a multi-cap strategy, ICON has the freedom to invest in small, medium and large companies without limitations or restrictions.

## INVESTMENT APPROACH

We think “outside the box” by investing in companies that may migrate in size from small-cap to mid-cap to large-cap and in style from growth to value.

## INDUSTRY ROTATION MAY CAPTURE THEMES

Because industry performance can vary widely within individual sectors, ICON employs an industry rotation approach to sector investing. The ICON system attempts to capture themes by rotating into what we believe to be underpriced industries demonstrating market leadership and rotating out of overpriced industries that are lagging in performance.

*There are risks involved with mutual fund investing, including the risk of loss of principal. There is no assurance that the investment process will consistently lead to successful results.*

*An investment concentrated in sectors and industries may involve greater risk and volatility than a more diversified investment. There are risks associated with small- and mid-cap investing such as less liquidity, limited product lines, and small market share.*

*ICON's value-based investing model is an analytical, quantitative approach to investing that employs various factors, including projected earnings growth estimates, in an effort to determine whether securities are over- or underpriced relative to ICON's estimates of their intrinsic value. ICON's value approach involves forward-looking statements and assumptions based on judgments and projections that are not guarantees of future results. Value investing involves risks and uncertainties and does not guarantee better performance or lower costs than other investment methodologies.*

*The unmanaged Standard & Poor's (S&P) Composite 1500 Index is a broad-based, capitalization-weighted index comprising 500 large-cap, 400 mid-cap, and 600 small-cap U.S. companies. The S&P 1500 Consumer Discretionary Index is an unmanaged capitalization-weighted index comprising companies in the Consumer Discretionary sector as determined by S&P. Total returns for the unmanaged index include the reinvestment of dividends and capital gain distributions beginning on January 1, 2002. Index returns with reinvested dividends and distributions are unavailable prior to that date.*

*The S&P 1500 Consumer Staples Index is an unmanaged capitalization-weighted index comprising companies in the Consumer Staples sector as determined by S&P. Total returns for the S&P Consumer Staples Index include the reinvestment of dividends and capital gain distributions but do not reflect the costs of managing a mutual fund. The Fund's composition may differ significantly from the indexes. Individuals cannot invest directly in an index.*
